

## ERW Pipe Mill Line

Hollow sections or ERW Pipes are one of the most versatile building materials products. Used widely in construction, furniture and general fabrication, hollow pipes are one of the most essential items for the developing markets. They are produced by bending the steel strips and weld the edges together by high frequency electric resistance welding process. These tubes can be produced in round, square, rectangle and various other shapes. Pipes can be manufactured using hot rolled, cold rolled or galvanized steel coil.

LLC "Atroy Sunny Engineering" has reach experience of designing the most suitable mills for each market depending on the sizes and thickness requirements.
