

ROLL FORMING MACHINES

LLC "Atroy Sunny Engineering" supplies complete range of roll forming machines for all types of applications. All types of roofing profiles and corrugation, decking, tiling profiles, purlins, formed channels and angles, cable tray,

ridge, gutter, flashing and even light structural members for light weight houses are available in our range.

Most machines are available in standard or high speed options with a variety of uncoiler options from 3MT to 20MT. We can also provide solutions to integrate the machines with client ERP systems.

All components used are from famous global brands for long term reliability.
