

MULTI SEED OIL EXTRACTION PLANT

Cooking oil is one of the most essential basic food commodities and it is imported widely in developing countries. We can provide economical solutions to extract oil from locally available oilseeds like groundnut, shea nut, cotton seen, copra or similar products. We provide turnkey solutions for cleaning, crushing, cooking, pressing and filtering to produce edible oils and depending on requirement we can supply matching refining units as well.

Oil Pressing Flowchart

Seed Cleaning → Destoning → Crushing → softening → Flaking
→ Cooking → Pre-pressing → Cake → [To solvent extraction](#) →
→ Oil & residual separating → Filtering → Crude oil → [To refinery](#)
