

SHORT CUT PASTA PRODUCTION LINE

Short cut pasta like Penne, Fusilli, Macaroni are relatively simple to manufacture compared to long pasta like Spaghetti. The equipment can be configured easily for small scale manufacturing with capacity of 200-30kg per hour. This is an ideal project for small niche payers to enter the pasta market with small investment. Raw materials for this project will be available locally in most countries.

Mixer--Screw Conveyor--Single Screw Extruder--Cutter--Cooling Machine--Hot Air Dryer--Automatic Fryer--Flavoring Line
